Gameplay Programmer with experience developing gameplay systems in highly optimized mobile games.

EXPERIENCE

2022 - 2025

SENIOR GAMEPLAY PROGRAMMER, ALIKE STUDIO

Developed and implemented many of the main gameplay mechanics and systems for Tamagotchi Adventure Kingdom, such as its decoration systems and vehicle physics, as well as several workflow optimization tools used by artists and developers

2022

ENGINE PROGRAMMER, THE GAME KITCHEN

I oversaw the early stages of researching and creating a custom version of Unreal Engine built for the creation of mods in a community-driven VR game.

EDUCATION

2018-2022

BACHELOR'S DEGREE IN GAME DESIGN AND DEVELOPMENT, INTERNATIONAL SCHOOL OF DESIGN, MURCIA

I studied a 4-year degree covering all aspects of game development, programming to 3D art to narrative design, and got Distinction in all technical subjects, and subjects related to my specialization, as well as the highest mark in my end-of-degree game project, Rocketeers.

SKILLS & TECHNOLOGIES

- C#, C++
- Unity, Unreal Engine
- Knowledge of Python for Tool Development and Automation in Blender
- Advanced knowledge of Editor Scripting workflows and architectures
- Advanced Knowledge of Spline, Animation Rigging, Mecanim, and other Unity Tools
- Great Knowledge of Linear Algebra, Trigonometry, PBR Rendering and Computer Graphics Algorithms
- Advanced knowledge of Unity's SRP API, both RTHandles and RenderGraph
- Experience in Unity DevOps, CI/CD, Unity Cloud Services and Build Automations
- iOS and Android development
- Great knowledge of programming design patterns and principles used in game development
- Experience with Agile workflows and version control systems
- Great knowledge of optimization techniques, CPU and GPU profiling
