afrgplus@gmail.com · [LinkedIn](#) · [Portfolio](#)

Technical Artist with experience developing tooling and shaders in highly optimized mobile games.

EXPERIENCE

2022 - 2025

PRINCIPAL TECHNICAL ARTIST / GAMEPLAY PROGRAMMER, ALIKE STUDIO

Developed and implemented the entire shader stack and post-processing effects for Tamagotchi Adventure Kingdom and other unreleased projects, as well as several critical tools used by artists and developers, and many of the main game systems and mechanics

2022

ENGINE PROGRAMMER, THE GAME KITCHEN

I oversaw the early stages of researching and creating a custom version of Unreal Engine built for the creation of mods in a community-driven VR game.

EDUCATION

2018-2022

DEGREE IN GAME DESIGN AND DEVELOPMENT, INTERNATIONAL SCHOOL OF DESIGN, MURCIA

I studied a 4-year degree covering all aspects of game development, programming to 3D art to narrative design, and got Distinction in all technical subjects, and subjects related to my specialization, as well as the highest mark in my end-of-degree game project, Rocketeers.

SKILLS & TECHNOLOGIES

- C#, C++
- Unity, Unreal Engine
- Advanced knowledge of Version Control Systems such as Git
- Advanced knowledge of Editor Scripting workflows in Unity (uGUI and UITK)
- Advanced Knowledge of Spline, Animation Rigging, Mecanim, and other Unity Tools
- Advanced Knowledge of UML, Design Patterns and Agile workflows
- Great Knowledge of Linear Algebra, Trigonometry and Computer Graphics Algorithms
- HLSL, OpenGL
- Blender, Substance Designer
- Photoshop, Krita
- Advanced Knowledge in Shader programming, Look Development, Compute Shaders, 3D graphics pipelines
- Great knowledge of graphics pipeline debugging tools such as RenderDoc or Unity's Frame Debugger
- Great knowledge of optimization techniques, CPU and GPU profiling
- Knowledge of Unity's SRP API, both RTHandles and RenderGraph
